2022 Aerial Imagery Now Available for Crow Wing County Residents

In the spring of 2022, we had aerial imagery captured for Crow Wing County by Pictometry. Crow Wing County GIS staff are excited to share that this flight had a resolution of 2"! In the past we captured 6" resolution imagery, so this was a significant improvement. You will see when viewing at the street level or closer, the amount of detail visible compared to past aerial images.

Every three years we update our aerial imagery to stay current with in-office work and provide residents with updated information. The next flight will take place in the spring of 2025.

"This adds tremendous value to our county having updated and high-quality aerial imagery. From the service to our customers and for the professionals and residents using it for many purposes." said GIS Coordinator Nate Rose. "We are excited to make this available to everyone who is using our Interactive maps and soon to be available for download on our GIS Hub site."

Contact the GIS staff at 218-824-1106 if you have questions or need assistance using the new mobile map application.

Here is a link to view the imagery in our Interactive Map.
